G 1500DS 12/15

Controlled Movement

The 1500 series tarpers come standard with a gear reduction chain drive control box. You may upgrade to control box with ground level control. If you prefer an automatic operation, choose our electric direct drive model which utilizes the most reliable motor on the market.

Covers

A heavy-duty black mesh cover comes standard on the 1500 Series tarpers. You may upgrade to an asphalt or waterproof cover.

Optional telescopic aluminum or steel housings (electric units only) offer maximum protection for the tarp and roller.

If using a solid cover, see if our patented Tension Hoop will benefit your application.

EDD 1500 DA 27/30

Springs

The 1500 Series tarpers come standard with the strongest 4" torsion springs on the market.

Options include: multi-leaf ribbon springs or underbody mount.

Arms

Choose from our heavy-duty steel arms or the strongest aluminum arms and bows available.
